CAREER OBJECTIVE:

Results-oriented Computer Science student with a strong foundation in Python, Java, and Full-Stack development. Proven ability to deliver robust applications under tight deadlines, including a full-stack solution built within a 48-hour timeframe. Seeking a Software Engineering role to leverage hands-on experience from internships at Cisco, Infosys SpringBoard, Edunet, and ServiceNow to solve complex technical problems.

Education:

Anurag University | Hyderabad, IN Bachelor of Technology in Computer Science | Expected May 2027

- CGPA: 8.24/10.0
-

PROFESSIONAL EXPERIENCE

Experience:

Cisco VIP Virtual Internship: *Network Automation & Simulation Tool* | 2025

- Developed a Python-based automation tool to parse configurations from Cisco routers and switches, automatically generating a visual network topology.
- Implemented a validation engine to detect common network configuration errors, such as MTU mismatches, to ensure network integrity.
- Engineered a multithreaded simulation to model Day-1 network activity, specifically focusing on processes like OSPF neighbor discovery.
- Validated the tool's accuracy against a complex, hierarchical enterprise network designed and configured in Cisco Packet Tracer.

Edunet Foundation & IBM | *AI & Cloud Technologies Intern IBM SkillsBuild Program*

- Selected for a competitive, mentor-led internship focused on project-based learning in AI and Cloud technologies using the IBM Skills Build platform.
- Designed and developed an end-to-end AI project, utilizing Python and IBM Watson Studio to analyze datasets and generate predictive insights.
- Engineered machine learning models to solve a real-world problem.
- Presented the project architecture, methodology, and outcomes to a panel of industry mentors for evaluation.

SmartBridge & ServiceNow Virtual Internship Program

gained hands-on experience and valuable knowledge across critical areas of the Now Platform, including:

- ServiceNow Administration Fundamentals
- Introduction to Agentic AI
- Introduction to Flows
- Automated Test Framework (ATF) Essentials
- Reports and Data Visualization (Get Started with Reports)
- Certified System Administrator (CSA) Exam Preparation

AICTE - EduSkills & Zscaler Oct 2025 – Dec 2025

- Completed a 10-week virtual internship program focused on next-generation cloud security and Zero Trust architecture.
- Gained practical knowledge in securing digital transformation using the Zscaler Zero Trust Exchange platform.
- Evaluated "Grade O (Outstanding)" for project performance and technical proficiency.

PROJECTS

CareerCraft – AI-Powered Career Preparation Platform

Full Stack | EdTech | AI Integration

- Developed an AI-powered platform for resume analysis, mock interviews, coding practice, and job recommendations.
- Implemented ATS-based resume scoring and personalized feedback using Google Gemini AI.
- Built a responsive frontend using React, TypeScript, and Tailwind CSS.
- Designed backend APIs using FastAPI (Python) and integrated Firebase Authentication and Firestore.
- Provided college-specific placement insights to improve student career readiness.

MediTrack: Health Manager | Web Application

- *Developed a patient-centric web application using HTML, CSS, and JavaScript to provide timely medication alerts and manage health schedules.*
- Integrated a third-party API to locate and display nearby medical professionals and pharmacies on an interactive map.
- Implemented an inventory management feature to track medicine stock and notify users when it was time to reorder.

AI-Powered Study Buddy (LearnMate) | Full-Stack Web Application

- Developed and deployed a full-stack AI-powered web application using Node.js, Express.js, and a third-party API (OpenRouter) to provide students with a suite of study tools.
 - Designed a modern and responsive user interface (UI/UX) with HTML, CSS, and vanilla JavaScript, incorporating a professional dark theme, dynamic animations, and a real-time loading spinner for a seamless user experience.
 - Engineered key features including an interactive quiz generator with score tracking, a note summarizer, and a flashcard creator, enhancing user engagement and learning efficiency.
 - Implemented a secure login system (for educational purposes) and deployed the application to a production environment (Render), demonstrating proficiency in full-stack development and cloud hosting.
-

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C
- **Web Technologies:** HTML, CSS, JavaScript, Node.js, Express.js
- **Databases:** Oracle, MongoDB
- **Cloud Security:** Zero Trust Architecture, Zscaler Platform.
- **Developer Tools:** GitHub, Cisco Packet Tracer.
- **Certifications:** Oracle OCI Generative AI Professional, Oracle OCI Data Science Professional
- **Other Skills:** Effective Communication, Interpersonal skills, Presentation.
